(a) coverage vs nominal (band: min–max over classifiers and seeds)
nominal
recording-grouped CV · LAC
recording-grouped CV · APS
leave-one-operating-point-out · LAC
leave-one-operating-point-out · APS
empirical coverage
nominal coverage 1−α
(b) per held-out operating point, leave-one-operating-point-out
nominal 80 %
logistic regression
random forest
empirical coverage (LAC, α = 0.20)
speed 900 rpm
torque 0.1 N·m
radial force 400 N
baseline (1500 rpm, 0.7 N·m, 1000 N)
